# Defense Visual Information

The Defense Visual Information (DVI) Directorate, Office of the Deputy Assistant Secretary of Defense for Public Affairs (Joint Communication), is the Department of Defense (DoD) proponent for Visual Information (VI) and Combat Camera (COMCAM). DVI provides functional oversight of these areas on behalf of the Office of the Secretary of Defense (OSD) and develops DoD policies and procedures for VI and Combat Camera.

In addition, DVI accomplishes OSD assigned Visual Information responsibilities related to VI product distribution and records management through three field activities: The DoD Joint Combat Camera Center (JCCC), the Defense Visual Information Center, and the Joint Visual Information Services and Distribution Activity.

The three strategic goals of DVI are: (1) Ensure VI is fully capable and integrated as a primary communication supporting capability of Strategic Communication; (2) Meet or exceed DoD and supported USG Agency communication requirements by making the widest possible spectrum of VI products and services readily and easily available; and (3) Foster the transformation, sustainment and improvement of the DoD Visual Information enterprise.

## Joint Combat Camera Center

### *Moving Imagery From the Warfighter to the World*

The Joint Combat Camera Center (JCCC) serves as the central reception and distribution point for all joint-interest still and motion imagery shot worldwide by combat camera, visual information, public affairs and other DoD imagery collection sources operating in joint and Service-specific wartime and contingency operations.

While the JCCC serves customers around the world, its core mission is to meet the imagery requirements of the Office of the Secretary of Defense, the Joint Chiefs of Staff, the Joint Staff, and the Combatant Commands. JCCC also provides imagery to other government agencies and distributes selected imagery to the general public.

The JCCC Web pages, located within the DVI Web site, contain detailed instructions for captioning, formatting, and transmitting still and video imagery to the JCCC.

Products and services provided by the JCCC:

- Rapid still and video imagery reception, processing, and management
- Searches of the Defense Imagery Server for still imagery and video clips
- Digital and hard copies of video clips
- FTP, SFTP, and FFT servers
- Staff-assisted searches of current and archived imagery holdings
- Limited duplication services
- The DoD Image Gallery, a daily e-mail of selected imagery received at the JCCC

Pentagon, Room 5E338

## Defense Visual Information Center

### *Preserving the Past ... Looking to the Future*

The Defense Visual Information Center (DVIC) is the Department of Defense's (DoD's) designated central records center for the storage, preservation and distribution of general purpose Defense imagery. As the DoD "Stock House," DVIC provides a working depository of imagery received from DoD military departments and activities. DVIC ensures that historical and other significant DoD imagery is preserved and the records are made available to members of DoD, other U.S. government agencies, and the American public.

DVIC's media holdings consist of millions of feet of motion picture film, thousands of hours of video, and hundreds of thousands of still images. The comprehensive media archive is comprised largely of current and historical operational and training imagery of military personnel, hardware, and activities around the world—on land, in the air and at sea.

DVIC provides four basic types of products and services:

- Still Media Products
- CD-ROM Still Photo Collections
- Motion Media Products
- Media Research Services

## Joint Visual Information Services Distribution Activity

*The "One-Stop Shop" Distribution Point for Current Visual Information and Multimedia Training Products.*

The Joint Visual Information Services Distribution Activity, or JVISDA, specializes in providing DoD customers with post-production services, including duplication, packaging, distribution, and reorder support, for their productions and other VI end products, distributed on video, CD-ROM, DVD, and other physical media.

JVISDA is also responsible for life-cycle management of most joint-interest DoD productions after they have been initially distributed.

JVISDA offers a suite of standing contracts with media service providers such as duplication houses to help make the post-production support more cost effective and efficient.

Services available from JVISDA include:

- Video, CD, DVD duplication
- Closed captioning and audio description
- Digital captioning and encoding services
- Video streaming
- Custom designed media packaging
- Worldwide shipping and mailing
- Production reorders fulfillment (DAVIS/DITIS)
- Post-production lifecycle management
- Custom designed labels and printing
- Foreign Military Sales (FMS)
